Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This office action is responsive to communications filed 06/27/03.

Claims 1 – 3 are pending.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 – 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Lull et al. (US 6,752,166).

Lull et al. discloses a system for dividing gas flow (Fig. 3, for example), wherein a gas in a primary flow path (155) is divided into a plurality of secondary flow paths (156,157,158), the flow rate of gas in each of said secondary flow paths being related to the flow rate in each other one of said secondary flow paths by a predetermined ratio, the system comprising: a plurality of mass flow controllers (SPLIT MFCA, SPLIT MFCB, etc.), there being one of said mass flow controllers arranged to control flow in each said secondary flow path; and a common controller (322) connected to all of said mass flow controllers; wherein one of said secondary flow paths is fully opened, the ratio of the flow rate of each other one of said secondary flow paths relative to the flow rate of said fully opened secondary flow path is set at a value of 1 or less, and said common controller delivers to the mass flow controller in each other one of said secondary flow paths, a set signal for controlling the flow therein, said set signal being obtained by

Art Unit: 3753

multiplying the measured flow rate in said fully opened secondary flow path by the predetermined ratio for said one of said secondary flow paths. Each said mass flow controller is a pressure sensing type mass flow controller and the secondary flow paths are connected to inlets (151-153) of a single processing chamber (360).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
